WORK EXPERIENCE

IT Manager & Digital Marketer / Printway

NOV 2018 — DATE (ABUJA, NIGERIA)

As part of the workplace team, I strategized and led design for the social media accounts. As the social media manager, I managed the Facebook, Instagram and Twitter Accounts of the Company.
I developed weekly content (timetable) for making posts on the various social media handles to drive customer engagement, which skyrocketed after a while. I ensured the good image of the company was kept and I was able to fulfill my primary purpose, which is to drive sales.

Industrial Traning / E-Library

National Youth Service Corps — 2018 -2019 (Keffi, NASARAWA NIGERIA)

I worked here as the computer system administrator, responsible for the day-to-day running of the computer systems at the library. I ensured all the systems were running at an optimal level. I ensured all software required by users were provided and ensured they were well attended to overall.
We also had computer-training programs for Secondary School Students who wanted to write Jamb exams and needed to practice. I spearheaded teaching them, taking them through the basics of ICT and most importantly how they went about their JAMB CBT EXAM.

Industrial Training Staff / Feghas Solutions

2014 (Ekiti State, NIGERIA)

Feghas Solutions Limited deployed the online portal for Ekiti State University; hence they needed to be on ground in school to manage the portal. My duty was to assist in helping students rectify payment issues such as those which occurred due to network downtime, others from Interswitch and the banks involved. So I worked with my boss to detect some of these issues and provide immediate solutions where required and overall to ensure the schools portal was functional and running optimally.

WORK EXPERIENCE

Web Designer & Trainer / Sedab Impact House

Volunteer Jan 2015 - Dec 2018 (Ekiti, NIGERIA)

I worked as a Web design Trainer. Focusing mainly on teaching participants who had little or no knowledge about ICT; web design. It was quite an interesting journey as I had to start from teaching participants what ICT was.
They gradually understood and I was able to continue, introducing them to the WordPress content management system and how to build existing websites using various themes and templates. I assisted in other capacities, such as digital marketing and I helped set up the Sedab Impact House Website.
We had some of the participants compete against themselves with prizes for the winner. All of this didn't just happen at a location; it happened across three states in the South West (Lagos, Ondo, and Ekiti States

My Projects

Freelancer 2017 - Date

Printway.ng – WordPress Content Management System was used, the goal was to showcase products and give basic information about the company.

Ajievlutionservices.com - WordPress Content Management System was also deployed in building this website. The owner wanted something simple and relatable.

Others - **Thechantalexperience.com, Darfortimmigration.com, Ample.org.ng**

User Interface/ User Experience Designer Intern/Projaro Academy
Got Familiar with tools for User Interface Design; Adobe Experience Design (Adobe XD) and, Figma.

Learned and understood the basics of User experience design, the strategy involved, how a customer journey map should be and lots of the processes involved in the user experience design project.
